Additional mode of payment through Applications Supported by Blocked Amount (ASBA) facility:

Pursuant to SEBI circular vide ref no. SEBI/IMD/CIR No. 18/198647/2010 dated March 15, 2010, an investor can subscribe to the units during New Fund Offer (NFO) through ASBA facility by applying through the ASBA application form and following the procedure as prescribed therein.

ASBA is an application containing an authorization given by the investor to block the application money in his specified bank account towards the subscription of units offered during NFO of scheme(s) of Religare Invesco Mutual Fund.

For an investor who applies through ASBA facility, the application money towards the subscription of units will be debited from his specified bank account only if his/her application is selected for allotment of units.

Benefits of Applying through ASBA facility:

- Writing cheque and demand draft is not required, as investor needs to submit ASBA application form accompanying an authorization to block the account to the extent of application money towards subscription of units. The balance money, if any, in the investor's specified bank account can be used for other purposes by the investors.
- Release/unblocking of blocked funds after allotment is done instantaneously.
- Unlike other modes of payment, in ASBA facility, there is no loss of interest income on the application money towards subscription of units as application amount remains in the bank account of the investor till the allotment is made.
- Refunds of money to the investors do not arise as the application money towards subscription of units is debited only on the allotment of units.

ASBA Procedure

- An investor intending to subscribe to the units during NFO through ASBA shall submit a duly completed ASBA application form to a Self Certified Syndicate Bank (SCSB) with whom his/her bank account is maintained.
- The ASBA Application Form towards the subscription of units can be submitted through one of the following modes:
 - submit the form physically with the Designated Branches (DBs) of SCSB ("Physical ASBA"); or
 - submit the form electronically through the internet banking facility offered by the SCSB ("Electronic ASBA").
- An acknowledgement will be given by the SCSB in the form of the counter foil or specifying the application number for reference. Such acknowledgement does not guarantee, in any manner, that the investors will be allotted the units he has applied for.

Note: If the bank account specified in the ASBA application form does not have sufficient credit balance to meet the application money towards the subscription of units, the Bank will reject the ASBA application form.

- On acceptance of physical or electronic ASBA, the SCSB shall block funds available in the specified bank account to the extent of application money specified in ASBA application Form.
- Application money towards the subscription of units shall be blocked in the account until (i) allotment of units is made or (ii) the application is rejected.
- SCSBs shall unblock the bank accounts for (i) transfer of requisite money to the Mutual Fund / scheme bank account against each valid application on allotment or (ii) in case the application is rejected.
- The list of SCSBs and their DBs where ASBA application form can be submitted is available on the websites of BSE (www.bseindia.com), NSE (www.nseindia.com) and SEBI (www.sebi.gov.in) and shall also be given in the ASBA application form.

The Investment Valuation Norms are defined in the Eighth Schedule of the Regulations (regulation 47) and circulars issued by SEBI from time to time.

SEBI vide its Gazette Notification No. LAD-NRO/GN/2011-12/38/4290 dated February 21, 2012 has introduced Principles of Fair Valuation in Eighth Schedule of the SEBI (Mutual Funds) Regulations, 1996 by amending Investment Valuation norms. - ii. Natural disasters or public disturbances that force the markets to close unexpectedly;
- iii. Significant volatility in the capital/currency/debt markets;
- iv. Liquidity stress in the system;
- v. War;

Considering the exceptional nature of events, it is not possible to cover all the potential exceptional events above and to define a standard methodology to be adopted for fair valuation of securities for such events. Annexure I

VALUATION NORMS FOR SECURITIES/ASSETS

A. Equity and Equity Related Securities:

1	Traded: Equity and Equity Related Securities (Including Normal Preference shares and Cumulative Convertible Preference Share (CCPS), Partly Paid-up Equity Shares, Rights)	Traded Securities are to be valued at the last quoted closing price on the selected Stock Exchange. Where security is not traded on the selected stock exchange, the last quoted closing price of another Stock Exchange may be used. If a security is not traded on any stock exchange on a particular valuation day, the value at which it was traded on the selected stock exchange or any other stock exchange, as the case may be, on the earliest previous day may be used, provided such date is not more than thirty days prior to valuation date. In case of preference share and CCPS, in case the same are not traded for more than 30 days, the same shall be valued in good faith by AMC depending on the type of preference share and appropriate illiquidity discount can be given. The selected Stock exchange would be National Stock Exchange (NSE). If a security is not traded on NSE, the price on Bombay Stock Exchange (BSE) would be considered. If the security is not traded either on NSE and BSE, the earliest previous day's close price shall be used, provided such day is not more than thirty days prior to the valuation date.
2	Non-traded/Thinly traded Equity and Equity Related Securities (Including Normal Preference shares and Cumulative Convertible Preference Share (CCPS), Partly Paid-up Equity Shares, Rights)	Thinly traded equity/equity related security is defined as, when trading in an equity/equity related security (such as convertible debentures, equity warrants, etc.) in a month is both less than Rs. 5 lacs and the total volume is less than 50,000 shares, it shall be considered as thinly traded security. Securities shall be valued in 'good faith' on the basis of the valuation procedure laid down by the Valuation Committee. In case security is not traded for 30 days the same shall be valued as below: (a) Based on the latest available Balance Sheet, net worth shall be calculated as follows: (b) Net Worth per share = [share capital+ reserves (excluding revaluation reserves) – Misc. expenditure and Debit Balance in P&L A/c] Divided by No. of Paid up Shares. (c) Average capitalization rate (P/E ratio) for the industry based upon either BSE or NSE data (which should be followed consistently and changes, if any noted with proper justification thereof) shall be taken and discounted by 75% i.e. only 25% of the Industry average P/E shall be taken as capitalization rate (P/E ratio). Earnings per share (EPS) of the latest audited annual accounts will be considered for this purpose. (d) The value as per the net worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 10% for ill-liquidity so as to arrive at the fair value per share. (e) In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalized earning. (f) In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero. (g) In case an individual security accounts for more than 5% of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security. Right entitlements will be valued as difference between the value of closing price of the underlying equity share and the rights offer price.
3	Unlisted shares / preference shares/ warrants / Rights (excluding instruments issued by listed companies and due for listing)	Securities shall be valued in 'good faith' on the basis of the valuation procedure laid down by Valuation Committee. These guidelines are similar to the guidelines applicable for non traded/thinly traded securities mentioned above only except the following: Computation of Net worth per share as lower of (a) and (b): (a) i) Net worth of the company = Paid up share capital + Reserves other than Revaluation reserve - Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses. ii) Net worth per share = (Net worth of the company/Number of paid up shares). (b) i) Net worth of the company = Paid up capital + Consideration on exercise of Option/Warrants received/receivable by the company + free reserves other than Revaluation reserve – Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses. ii) Net worth per share = (Net worth of the company/{Number of paid-up shares + number of shares that would be obtained on conversion/exercise of outstanding warrants and options}). If the net worth of the company is negative, the share should be marked down to Zero. Computation of fair value per share to be considered for valuation at 15 % discount for illiquidity. $[(\text{Net worth per share} + \text{Capitalized value of EPS}) / 2] * 0.85$ In case the latest balance sheet i.e. balance sheet prepared within nine months from the close of the accounting year of the company, is not available (unless the accounting year is changed) the shares should be valued as zero. At the discretion of the AMC and with the approval of the trustees, unlisted equity scrip may be valued at a price lower than the value derived using the aforesaid methodology.

4	Equity / Index Options & Equity / Index Futures Derivatives	The Exchanges give daily settlement prices in respect of all derivatives positions. These settlements prices shall be used for the purpose of valuation.
5	ADR/GDR/Offshore Securities	• If the security is listed in a time zone ahead of ours than the same day price as provided by Reuters would be used for valuation. • If the security is listed in a time zone behind ours than the previous day's price would be used for valuation. • In case the security is not traded on the above mentioned days, price of previous day should be used provided the price is not prior than 30 days. • In case the security is not traded for more than 30 days, AMC shall provide the fair price for the same. Converting the price in Indian Rupees (INR) Since these prices are in foreign currency these are to be converted in Indian Rupees by applying the exchange rate on Reserve Bank of India. Reuters / Bloomberg also provide closing conversion rate, which can be used for converting the foreign currency prices in INR. This closing price in INR should be used for valuation of ADR/GDR/ Offshore securities.
6	Application Money for Primary Market Issue:	Application money should be valued at cost up to 60 days from the closure of the issue and / or allotment. If the security is not allotted within 60 days from the closure of the issue or listed within 60 days from the date of allotment, application money is to be valued as per the directives of valuation committee. Rationale of valuing such application money should also be recorded
7	Shares on De-merger and Other Corporate Action Events	Both the shares are traded immediately on de-merger: In this case both the shares are valued at respective traded prices. Shares of only one company continued to be traded on de-merger: In such a scenario, the shares of Non Traded/Unlisted would be fairly valued in good faith by AMC on case to case basis. Traded share shall be valued at traded price. Both the shares are not traded on de-merger: In such a scenario, the shares of both the companies would be fairly valued in good faith by AMC on case to case basis. In case of any other type of capital corporate action event, the same shall be valued at fair price on case to case basis.

B. Debt and Money market securities:

1	Traded Securities	Valuation at the price derived from the weighted average yield / price of traded securities (other than Govt. Securities) irrespective of the settlement date. a. For instruments maturing above 1 year: The weighted average yield / price of traded securities (including trades of the AMC of minimum Rs. 5 crores face value) will be considered if there are at least two trades aggregating to Rs. 25 crores face value or more on a public platform* excluding the inter scheme transfers of others; or Trades of the AMC of minimum Rs. 5 crores face value, including inter scheme transfer. b. For instruments maturing above 60 days and upto 1 year: The weighted average yield / price of traded securities (including trades of the AMC of minimum Rs. 5 crores face value) will be considered if there are at least three trades aggregating to Rs. 100 crores face value or more on a public platform* excluding the Inter Scheme Transfers of others; or Trades of the AMC of minimum Rs. 5 crores face value, including inter scheme transfer. Note: • If market trades and trades of the AMC do not fulfill the above criteria then the security will be treated as 'Non-traded'. • Outlier trades, if any, will be ignored after recording of suitable justification. c. For instruments maturing <= 60 days: • Assets will be amortized on straight line basis as long as their valuation remains within $\pm 0.10\%$ band of the price derived from the reference yield (reference price) provided by agency(ies) appointed by AMFI). • In case the amortised price falls outside the above band, the reference price of the asset will be adjusted in order to bring the price within $\pm 0.10\%$ band. • At the time of first purchase, the spread between the purchase yield and the benchmark yield, as provided by the AMFI designated agency(ies) will be fixed. The addition of this spread to the benchmark yield will provide the reference yield. This spread will remain fixed through the life of the instrument & will be changed only after providing the justification for the change. In case of subsequent trades in the same security by the AMC or others (reported on a public platform), the valuation will reflect the weighted average yield of the traded securities as long as it meets the above mentioned criteria for traded securities maturing below 1 year. The spread can also be changed after prior approval of the Chief Executive Officer (CEO), in case of change in the credit rating or credit profile of the issuer which would require a re-evaluation to reflect appropriate spread.
---	-------------------	---

2	Non - Traded Securities	For valuation of securities with residual maturity <= 60 days: ➤ Assets will be amortized on straight line basis as long as their valuation remains within 0.10% band of the price derived from the reference yield (reference price) provided by agency(ies) appointed by AMFI) ➤ In case the amortised price falls outside the above band, the reference price of the asset will be adjusted in order to bring the price within ±0.10% band. ➤ At the time of first purchase the spread between the purchase yield and the benchmark yield, as provided by the AMFI designated agency(ies) will be fixed. The addition of this spread to the benchmark yield will provide the reference yield. This spread will remain fixed through the life of the instrument & will be changed only after providing the justification for the change. In case of subsequent trades in the same security by the AMC or others (reported on a public platform), the valuation will reflect the weighted average yield of the traded securities as long as it meets the above mentioned criteria for traded securities maturing below 1 year. The spread can also be changed after prior approval of the Chief Executive Officer (CEO), in case of change in the credit rating or credit profile of the issuer which would require a re-evaluation to reflect appropriate spread. For securities with residual maturity > 60 days: ➤ Valuation will be done using the CRISIL Aggregator Matrix with no limit on the discretionary mark-up and mark-down. At the time of first purchase the spread between the purchase yield and the benchmark yield as per the aggregator matrix will be fixed. ➤ For change in discretionary mark-up and mark-down (credit spread): The credit spread with reference to the benchmark yield, on any valuation date, can be changed with prior approval of the CEO based on primary market supply, significant trading activity in the secondary market in same or similar security, prospects of a credit event, etc. Criteria for identifying similar securities: Similar security should be identified by the following waterfall logic, provided that the maturity date of the security is within the same calendar quarter: - Same issuer and same type of asset, with maturity date within ± 15 working days of maturity date of security shall be considered first. If no such instance is available, then Step ii to be followed: Example: For Punjab National Bank CD maturing on March 6, 2013, all secondary market trades of Punjab National Bank CDs maturing within February 13, 2013 to March 28, 2013 will be considered first. - Similar security from a different issuer within the same category (PSU Bank, Private Bank or Financial Institution etc) and similar credit rating, with maturity date within ± 15 working days of maturity date of security will be considered. Example: For Punjab National Bank CD maturing on March 6, 2013, all secondary market trades of similar public sector bank CDs maturing within February 13, 2013 to March 28, 2013 will be considered. Note: • Outlier trades, if any, will be ignored after recording of suitable justification. • The existing policy of valuation will be followed until the reference prices are available from the designated agencies.
3	Inter-scheme Transfer (IST)	IST would be at the price derived from the weighted average yield/price of traded securities at the time of the IST: For instruments maturing above 1 year: The weighted average yield / price of traded securities (excluding inter scheme transfers of others) will be considered if there are at least two trades aggregating to Rs. 25 crores or more for same or similar security on a public platform*; or Trades of the AMC of minimum Rs. 5 crores face value. For instruments maturing below 1 year: The weighted average yield / price of traded securities (excluding inter scheme transfers of others) will be taken if there are at least three trades, with each trade being of a minimum Rs. 25 crores face value, aggregating to Rs. 100 crores or more for same or similar security on a public platform*; or Trades of the AMC of minimum Rs. 5 crores face value. Note: Outlier trades, if any, will be ignored after recording of suitable justification. Criteria for identifying similar securities would be as stated above in this Policy.
4	Valuation of Government Securities/ State Government Securities (SDL)/ T Bills/ Cash Management Bills	Valuation basis would be the average of security level prices received from AMFI designated agencies except in case of T-bill and cash management bill less than 91 days which would be on amortization basis until security level prices are available from designated agencies.
5	Interest Rate Swap (IRS)	In case of IRS contracts, counter parties agree to exchange stream of interest payments on notional value at an agreed date. One party agrees to pay floating and another agrees to pay fixed rate of interest. Floating rate is decided on the basis of a benchmark such as NSE MIBOR/3 Day MIBOR. Valuation of IRS involves valuation of streams of interest payments. The underlying security is valued in the same manner as was valued before entering into IRS contract. Value of IRS contract is the present value of the difference between the fixed and floating interest to be received/paid on maturity of the contract. Floating rate interest till maturity is the interest accrued till the valuation date plus the interest on remaining period at reversal rate. Reversal rate for the day is available on Reuters/Bloomberg for different maturities. The relevant rate is taken on the basis of maturity of the contract. However, if the maturity date falls between the two years, the reversal rate is arrived by interpolation on valuation date.
6	Bank Fixed Deposits, CBLO / Reverse Repo, Bills rediscounting	Bank Fixed Deposits, CBLO / Reverse Repo, Bills rediscounting securities would be valued at will be valued at cost plus accruals/amortization.

Notes:

- *Public Platform refers to:
F-Trac/NSE WDM/BSE WDM: For corporate bonds/debentures, commercial papers, certificate of deposits and securitized debt
Order of preference for the public platforms for consideration would be as follows:
 - F-Trac
 - NSE WDM
 - BSE WDM
- Weighted average yield shall be rounded up to two digits after decimal point.
- Weighted average yield will be calculated for non-coupon bearing securities. Weighted average price will be calculated for coupon bearing securities.

C. Other securities:

1	Convertible Debentures	The non-convertible and convertible components of convertible debentures and bonds shall be valued separately. The nonconvertible component would be valued on the same basis as would be applicable to a debt instrument. The convertible component shall be valued on the same basis as would be applicable to an equity instrument. If, after conversion the resultant equity instrument would be traded pari passu with an existing instrument, which is traded, the value of later instrument can be adopted after an appropriate discount for the non-tradability of the instrument during the period preceding conversion. While valuing such instruments, the fact whether the conversion is optional will also be factored in.
2	Valuation of Mutual Fund Unit (MFU)/ Valuation of Exchange Traded Fund (ETF)	MFU and ETF listed and Traded would be valued at the closing traded price as on the valuation date. Unlisted MFU and listed-but-not-traded MFU and ETF would be valued at the NAV as on the valuation date.
3	Gold	Since physical gold and other permitted instruments linked to gold are denominated in gold tonnage, it will be valued based on the market price of gold in the domestic market and will be marked to market on a daily basis. The market price of gold in the domestic market on any business day would be arrived at as under: Domestic price of gold = (London Bullion Market Association AM fixing in US\$/ounce X conversion factor for converting ounce into kg for 0.995 fineness X rate for US\$ into INR) + custom duty for import of gold + sales tax/ octroi, stamp duty and other levies applicable. On any day the LBMA AM fixing or RBI reference rate is not available due to a holiday, then the previous day price is applied for the purpose of calculating the value of gold.

In cases which do not fall under the aforesaid circumstances, the cost of acquisition of bonus units for the investors would be NIL, as provided by section 55(2) of the Act.

14. Exemption in respect of Long Term Capital Gains:
